Sub: USSOR 2010 – Confirmation of strength of bricks and operation of deduction item in execution of brick work -Reg.

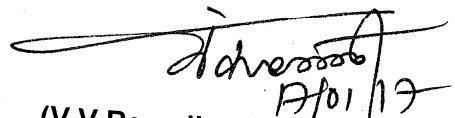

Ref: DY CVO/E's letter no. G.265/V/E/System improvement dt 21.12.2016.

* * *

1. Vigilance vide reference above advised,
 - i. that during a vigilance preventive check, it has been observed that the bricks used for various works in the units are of class designation 3.5 but the payments were made for class designation 7.5 under item no. 051026 of USSR-2010 without operating deduction item 057104 resulted into financial loss. In this regard, it is brought out that 'scale of testing of brick samples' as specified under para 5.1.4.3(C) of table 5.4 of Unified Specifications 2010 was not being followed by the concerned field executives while executing the work.
 - ii. to reiterate the 'Specification of scale of testing of brick samples under USSR-2010 to all field units of open line/construction organization 'and for 'incorporation in the schedules for operation of deduction item 057104 for lesser class designation bricks used for the works' as well as the implementation of such shall be carried out by the concerned field executives to avoid financial loss to Railways.
2. In this connection, all the divisions and field units are hereby advised to strictly follow the USSOR and Unified Standard Specifications for the purpose of payment and maintaining good quality of the work while executing the brick work items as well as all the items of other chapters of USSOR also.
3. While executing any work, USSOR is to be read in conjunction with Unified Standard Specifications. Hence, it may be ensured while executing any item of USSOR that relevant Unified Standard specifications of that work are strictly followed.

All the concerned may be advised of the contents of this letter for strict adherence and action taken may be acknowledged.

This is issued with the approval of PCE.
