**Sub:** Construction of RUB/Subways – SAG level certification for Drainage – reg.**Ref:** RB Lr No.2017/CE-IV/RUB/88 dt 18.02.2021

&gt;&lt;&gt;&lt;&gt;&lt;&gt;&lt;&lt;

In terms of Railway Board's letter under reference, before sending any proposal for sanction of RUB/Subway in lieu of LCs, certification is prescribed at **SAG** level that **RUB/Subway is feasible at the proposed location and there will not be any problem of waterlogging in future**. Availability of such certification is also being insisted presently by CRS/SCC while giving sanction to the execution of RUB/LHS works.

In order to facilitate above certification following guidelines may be followed:

**A. New proposals:**

1. Sectional Sr.DEN/DEN shall personally inspect and verify the feasibility of construction of a RUB/LHS at the LC location with adequate drainage arrangements and the proposal shall be processed for approval and certification by ADRMs of Engineering discipline.
2. If ADRM of Engineering discipline is not available in a Division, the proposal shall be forwarded to Headquarters for certification by Mentor HOD of the Division. RSW section of Headquarters will process the case directly for approval of mentor HOD.
3. All such proposals for RUB/LHS works shall then be processed further through IRPSM for sanction. RSW section in Headquarters will process these RUB/LHS proposals only after receipt of certification on drainage.

**B. Sanctioned works where GAD yet to be approved:**

1. The Sectional Sr.DEN/DEN shall personally verify the drainage arrangements provided in the proposed RUB/LHS and certify adequacy of the same in the check print GAD.
2. The Check print GAD shall be put up to ADRM of Engineering discipline for certification of drainage before processing the GAD for approval of Headquarters.
3. If ADRM of Engineering discipline is not available in the Division, the check print GAD shall be forwarded to Bridge Design section of Headquarters which shall be put up to the Mentor HOD of the Division for certification of drainage.

**C. Sanctioned works where GAD already approved:**

1. Where the GAD is already approved and certification by SAG officer on drainage is required only for obtaining CRS sanction, the same shall be obtained directly from ADRM or Mentor HOD concerned as the case may be. Bridge Design Section of Headquarters will process the case directly for approval of mentor HOD.
