Sub: Implementation of store module in TMS -Reg.

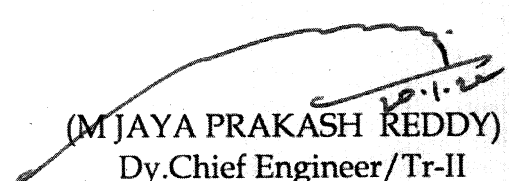

Ref: CVO/Engg's ltr No.G.265/V/E/Sys.improvement, dt.12.01.2022 .

With reference to the letter cited above, during the preventive checks done by vigilance, it is observed that manual DMTR i.e., ledgers are still being maintained along with TMS store module. Also store balances of certain materials are not tallying between TMS data and manual ledgers. Quarterly reports are being submitted to divisions in hard copies along with DMTRs/ledgers for scrutiny.

In this regard, it may be noted that TMS Store module has been implemented in SCRly w.e.f 01.04.2018 with material master available in TMS Store Module. The same had been confirmed by all divisions.

Hence all divisions are advised to take necessary actions to switch over to electronic mode of TMS store module from manual mode by this month end i.e., 31st January '2022. From 1st February onwards all the DMTR and ledgers are to be through TMS only and same has to be ensured by divisions.

It is understood that a few items are not available in TMS module. Manual ledgers can be maintained only for the items not available in TMS module.
