Sub:- Non-deduction in COE quantity for used cut spoils obtained from cuttings/ foundations – Reg.

.....

During preventive checks conducted in some of the construction projects by Vigilance Branch, it is observed that deductions of cut spoils from cuttings & foundations, when used in embankment as COE /SQ2, are not being done, resulting in excess payment to the agencies. The concerned are also failing in ensuring deductions during technical checks.

It is also noticed that certain quantity of excavated earth from cuttings & foundations is not being utilized in embankment fill on the pretext of unusable soil without the approval of competent authority.

In view of the above, the following instructions are issued:

- Dy.CEs shall ensure classification of the cut spoils from cuttings / foundations etc. for suitability towards reuse in embankment. A proper record shall be maintained.
- It shall be ensured that deductions are made for used cut spoils in the same running bill of contract to avoid excess payments.

This is issued with the approval of CAO/C/SC.
