Sub: Preventive check conducted at Ravikampadu goods shed on
19.08.2024

A Preventive Check was conducted by Vigilance at Ravikampadu goods shed on 19.08.2024. During the course of check, it was noticed that two mini rake indents for timber waste were pending at RVD goods shed for PSPG in the month of Oct-2023 and a full rake was supplied. However, instead of giving simultaneous placement for both the indents, two separate placements were given. This led to undue gain for the loading party by providing 10 hours of loading time instead of 5 hours.

Further, as per the loading order register at BZA/Control office two messages were given without specifying date and time, indicating a systemic lapse. As the two loading messages were given simultaneously, the same was wrongly interpreted by the on-duty station staff.

In view of the above, it is requested to kindly issue necessary instructions to the concerned officials to avoid recurrence of such irregularities at other loading points and Control Office over SCR. Action taken on this issue may please be communicated to this office.

This is issued with the approval of SDGM.

Sub: Preventive check conducted at Ravikampadu Goods Shed on 19.08.2024 by Vigilance – Reg.

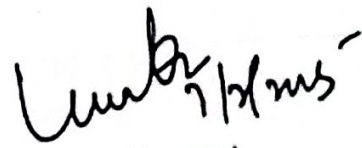

Ref : Dy.CVO/T&RPF/SC's letter No.G.265/PC/2024/08/01204/T/N/BZA dated 05.02.2025.

A preventive check was conducted by Vigilance at Ravikampadu Goods Shed on 19.08.2024.

During the course of check, it was noticed that two mini rake indents for timber waste were pending at Ravikampadu Goods Shed for PSPG in the month of October 2023 and a full rake was supplied. As per the Loading Order Register at BZA Control Office, two messages were given without specifying date and time, indicating a systemic lapse.

As the two loading messages were given simultaneously, the same was wrongly interpreted by on-duty station staff. Due to this, instead of giving simultaneous placement for both the indents, two separate placements were given, which led to undue gain for the loading party by providing 10 hours of loading time instead of 5 hours.

In view of the above, it is hereby instructed that recurrence of such irregularities may be avoided at all loading points and Control Offices over the zone.
