

INDEX

Air brake stock	3-2
Air brake sub assembly	8-4
Air Brake system	8-1
Air brake testing	3-8
Alignment	5-5
Anti corrosive measure	4-4
Application	8-3
Auxiliary reservoir	8-21
Axle	6-109
BG Draw Gear	9-3
BLC wagon	11-7
Bogie brake gear	6-9
BOXNCR	11-5
BOXNHA	11-1
BPC for air brake – End to end run	3-23
BPC for air brake close circuit rake	3-19
BPC for Vac brake – End to end run	3-25
Brake cylinder	8-12
Brake rigging	8-102
Brake rigging setting	8-37
Branding details on Wheel & Axle	Appendix VI
Buffer Height	9-3
Buffer Projection	9-2
C3W Distributor valve	8-39
CASNUB bogie	6-1
CASNUB Bogie ROH	2-9
Cast steel bogie	6-35
Centre buffer coupler and draft gear	9-8
Charging	8-3
Cleaning of Tank wagon for corrosive liquid	10-8
Close circuit	3-2
Coil spring	6-39
Composition Brake Block	8-108
Condemnation of wagons	2-12
Constructional Details(Tank wagon)	10-1
Conventional Buffing Gear	9-1
Corrosion in wagon body	4-3
Coupler Reclamation Practice	9-12,16,17
Covered wagon construction	4-2
CRT wagon ROH	2-10
Cut off angle cock	8-8
Dirt collector	8-17
Distribution of staff	3-27
Distributor valve	8-39
Diamond frame bogie	6-45
Drawing reference number	6-16
Estimated cost of rectification	2-4
Examination and repair at sick line & base depot	10-17, 25
Examination of defects	2-2
Examination of origination load	2-7
Examination of termination load	2-6, 3-7
Examination points	3-1
F type cylinder	7-2
Flat wagon construction	4-2

Floor plate repair	5-8
Four-wheeler underframe	5-4
FRLP	6-99
Gd's Emergency brake valve	8-22
High tensile coupler	9-19
Hopper wagon construction	4-2
Important modifications	4-15
Important dimension of wagons	1-2
Important do's and don'ts	4-15
Important parameters during sick line	3-10
Important parameters during Intensive examination	3-9
Infrastructure & facility in yard	3-14
Inspection of CBC	9-10, 11, 23, 25, 26, 27
Inspection of spring in workshop	6-57
Inspection of Tank barrel	10-9
Intensive BPC	3-2,5
Intensive examination	2-8, 3-1, 3,4
Joint procedure order for freight stock examination	3-16
Journals	6-85
KE Distributor valve	8-65
Limitation of vacuum brake	7-7
List of Modification on freight stock	Appendix III
Louvers	4-13
Machinery & plants	3-15
Maintenance & repair (Vac brake)	7-11
Maintenance and repair in workshop (tank wagon)	10-26
Maintenance of sub assembly	6-28, 40
Maintenance periodicity	2-6
Man hours for various examinations	3-16
Mark 50 draft gear	9-29
Marking of parts (CBC)	9-45
Mechanical Code	10-1
Method of reporting	2-3
MG buffing and draw gear	9-34
Modification	7-9 , 10-16, 27
Nominal clearance	6-13
NPOH	2-11
Open wagon construction	4-1
Operation principle (Air brake)	8-1
Parts of CBC	9-8
Periodicity of Overhauling(Tank wagon)	10-6
POH & ROH intervals	2-13
POH interval for vac brake stock	2-14
Precaution for welding stainless steel	11-6
Precaution with leaky tank	10-18, 20, 23, 24
Preventive maintenance	1-1
Principle of operation (Vac brake)	7-6
Problem in Bk system & remedies	3-13
RF- 361 draft gear	9-20
Railway Workshop	Appendix V
Rake test	8-88
Re axling	6-114
Re tyring	6-115
Repair and maintenance in workshop	5-31, 6-12, 33, 44, 48, 75, 118 , 7-17
Reclamation of Screw Coupling	9-6
Rejectable defects	6-55, 66
Release	8-4

Repair and maintenance during POH	8-95 & 9-39
Repair and maintenance during ROH	8-92, 9-38
Repair and maintenance in sick line	8-90, 9-7, 38
Repair in Sick line & ROH depot	4-4, 5-30, 6-11, 32, 43, 48, 74, 118, 7-15, 16
Repair of headstock	5-6
Repair of Tank wagon pressure vessel	Appendix IV
Repair to bulged ends	4-11
ROH interval of wagons	2-14
Roller bearing axle boxes	6-71
Roller Bearing defects	2-3
Rolling in Examination	2-6, 3-3
Rulebooks and references	1-10
Salient features of CASNUB	6- 3
Scrag test	6-59
Shank	9-13
Single wagon test	8-84
Slack adjuster	8-25
Standard Infrastructure for wagon depot	1-12
Standardisation of Infrastructure in Air brake ROH depot	Appendix II
Steam Cleaning	10-6, 8
Suspension	6-49
Suspension for four-wheeler	6-50
Tank Wagon	10-1
Test proforma for DV	8-81
Testing of Tanks	10-10, 11
Testing of barrel	10-9, 14, 16
Testing of Wagon brake equipment	8-97
Tools	3-15
Tyre profile	6-111
UIC bogie	6-17
UIC bogie ROH	2-8
Vacuum brake	7-1
Vacuum brake stock	3-2
Vendor List	9-41
Wagon fit to run with passenger train	2-7
Wagon fleet	1-11
Wagon Manufacturers	Appendix V
Wagon modifications	1-12
Wagon ROH Depot	Appendix V
Wagon under frame construction	5-1
Warranty inspection	2 -1
Water tightening of wagons	4-11
Wheel defect	6-117
Wheel set	6-4, 109
Work areas attention to be given	2-14
Yard maintenance	3-1
