Dt .08.03.2019

Dy.CMMs/SD/LGD,RYPS,TPTY

Sub: Maintenance & Up-keep of electronic weigh Bridges in stores depots-reg.

- Ref:1. Dy.CVO/Store's letter no. G.265/PC/2018/11/01082/1105/1358/S/N/SC . dt.21.02.2019.
2.This office letters of even No.dt.13.11.2018, 07.02.2019 & 14.02.2019.

AAAA

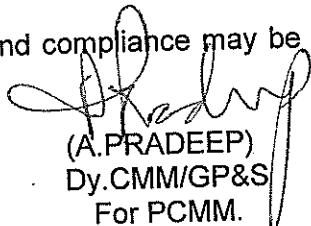

During the preventive checks conducted by the Vigilance deptt in scrap depots., the following deficiencies were noticed.

1. CCTV cameras installed in the premises of weigh Bridges are not adequate as the scope of coverage is limited.
2. It is noticed that there is no AMC for maintenance of CCTV cameras in some of the depots.
3. It is noticed that approach area towards the load cells are easily accessible.

In view of the above, the following system improvement is suggested for maintenance & Up-keep of electronic weigh Bridges in stores depots.

1. Up-gradation to Digital load cells to make tamper-Proof as the present Load cells are Analogue in nature which are susceptible for tampering.
2. Concealing of load cell cables & weigh bridge area so as to restrict unauthorised access.
3. Installation of adequate CCTV cameras in the vicinity of weigh Bridges for proper monitoring of activities during scrap arousal/disposal duly maintaining the AMCs.
4. AMC contractors/OEMs of the weigh bridges may be approached to develop requisite breach detecting software to display the loading process graphically which can help in detecting such manipulation.

Necessary action may be taken accordingly and compliance may be advised to this office.
