SOUTH CENTRAL RAILWAY ENGINEERING STANDING ORDER NO.9

Provision of guard rails under FOBs/ROBs.

At present guard rails are being provided on all girder bridges whether major or minor and also on major and important ballasted deck bridges as per Para 275 of IRPWM 1986.

It has now been decided to provide guard rails on track below FOBs/ROBs on the lines adjacent to piers and abutments. This is required to protect columns/piers/abutments of FOBs/ROBs from damage against derailments.

The design and maintenance of these guard rails shall be as per Para 275 (2), (3) and (4) of IRPWM, 1986.

(S.P.IYER)
CHIEF ENGINEER
S.C.Rly. /Secunderabad.
